STEEL THAT TRULY FIGHTS CORROSION

Ideal for managing high TDS across regions.
Up to 50% extra safe & durable Certified by (CSIR – SERC)

Hardness in water accelerates corrosion and rust, impacting the life of conventional steel. ARS CRS 550D, manufactured using state-of-the-art technology, offers superior resistance to corrosion. It is the ideal choice for regions with high TDS in groundwater, including areas exposed to highly corrosive water conditions, ensuring enhanced durability and long-term structural safety.
